No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                               US-09-684-215B-4

Patent No. 6290569

GENERAL INFORMATION:
APPLICANT: Reed, Steven G.
APPLICANT: Dillon, Davin C.
APPLICANT: Oampos-Neto, Antonio
APPLICANT: Houghton, Raymond
APPLICANT: Wardzik, Thomis S.
APPLICANT: Wardzik, Daniel R.
TITLE OF INVENTION: COMPOUNDS AND METHODS FOR IMMUNOTHERAPY
TITLE OF INVENTION: AND DIAGNOSIS OF TUBERCULOSIS
NUMBER OF SEQUENCES: 153
CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            ZIP: 98104-7092

AX005788 1068 bp 1
Sequence 907 from Patent WO9909186.
AX005788
```

```
Polygeptide nucleic sequences exported from mycobacteria, vectors comprising same and uses for diagnosing and preventing tuberculosis Patent: WO 9909186-A 999 25-FEB-1999; PORINOI DENIS (FR); GYLGUENO AGNES (FR) Location/Qualifiers
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                985 ATCACCGCGGCGCCCCCCCCGATCAACTCGGCCACCGCGATGGCGGACGCGCTTAAC 1044

Mycobacterium tuberculosis CDC1551

Mycobacterium tuberculosis CDC1551

Bacteria, Actinobacteria; Actinobacterium; Mycobacterium tuberculosis Complex.

Corymabacterinaes, Mycobacteriaceae, Mycobacterium; Mycobacterium tuberculosis complex.

1 (bases 1 to 14029)

2 Pleischmann, N.D., Alland, D., Bisen, J.A., Carpenter, L., White, O., Peterson, J., DeBoy, R., Dodson, R., Gwinn, M., Haft, D., Hickey, E., Kolonay, J.F., Nelson, W.C., Umayam, L.A., Ermolaeva, M., Salbberg, S.L., Delcher, A., Utterback, T., Weidman, J., Khouri, H., Gill, J., Mikula, A. and Bishai, W.

Whole genome comparison of Mycobacterium tuberculosis clinical and laboratory strains
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Teleschmann, R.
